**Attachments:** Charge QuestionsPV29\_letter review 120320 AM comments only.docx

Todd,

Per our discussion, we are considering sending the attached file to OPPT today (your comments removed). We will include the following qualifiers:

- 1) The draft compilation of comments is incomplete as we are awaiting a final set of comments from a reviewer who could not meet the November 30 deadline due to a personal emergency.
- 2) The Peer Review Leader is following up with several reviewers to seek clarifications and additional information.

We can add that we may be able to provide an updated draft that includes the additional reviewer comments before COB tomorrow. The final compilation is on track for submission and public release on or before December 11.

Is this correct? Further thoughts?

Thanks.

Steve

**Importance:** High

Hi Steven – just for awareness, we are on a very tight timeline with PV 29, with expectations that the final gets to the Administrators desk by January 15, and many steps still to be taken before then. We need to see the comments in some form ASAP so that our scientist can begin thinking about how to respond – at this late stage, with our deadline, every day counts. All of the other players in the process, including OMB, the OCSPP IOAA, and the administrator's office, have been streamlining steps.

**I would ask that we find some way to get us the text of the PR comments, in some format, asap – preferably today, certainly before the weekend.**

If that is not possible, then with regret this is likely an issue that I will have to elevate.

Please let me know if you would like to discuss, or if there is anything we can do to expedite this.

Thanks, Andy

Seema,

Unfortunately, we have some processing to do before we can forward the comments. We may be able to provide a draft compilation by Tuesday of next week. We believe we're on track to provide the final document by next Friday, December 11.

With respect to the final document, Janet raised a concern about releasing the peer review comments while public commenting is ongoing. Is this something OPPT wishes to discuss further?

Thanks.

Hi Todd and Steve,  
If we haven't already, can you send us the raw comments that we've received from the peer reviewers? We're very crunched on time to respond to both peer review and public comments and any advanced copies of the peer review comments by today would be very helpful.

Thanks,

Janet,

Interesting question.

I will defer to Steve Knott for coordination on docket posting.

However, regardless of when I am directed to post the peer reviewer response document ... I will finish the formatting and document preparation and certainly forward

that to OPPT when ready (and at present my goal is Friday December 4 or Monday December 7 at the latest).

Todd

I have a question. Once the letter peer review report is posted to the docket will it be publicly available prior to the deadline for receipt of the general public comments (including Sun Chemical, their manufacturing group, lawyers and consultants? These are now due on Dec 19. Does that mean we could received their comments on the peer review report as well as the revised draft risk evaluation.

Thanks

Janet

Seema,

Today is the deadline for submission of the peer review responses. The reviewers have until COB west coast (so essentially up to 11:59 PM today) to send their responses to me.

Tomorrow I will start work on pulling together the responses by charge question and do some formatting, etc. Once completed the document will be ready to pass forward to OPPT and post to the docket.

I'll need a few days to complete this process.

The chart below needs to reflect that the FRN for 1,4 D published last week ... TCE is to come out soon (I think November 25).

Thank you Amparo!

This is the docket for 1,4 Dioxane.

Yvette, please remind me in the future to help you with gathering comment documents. Happy to help if you wish!

I can make a folder in the OneDrive folder I created for the 1,4 D files ... and drop the comment documents there for easy reference. That OneDrive folder is the one I sent a link to you for access.

Once the comment period closes, I can make a final look to collect comment files for you.

Otherwise, you and your team can always go to [regulations.gov](https://www.regulations.gov) and look for incoming comments ... it works either way!
